

# Three page roll fold brochure

Here are a few words about the following brochure design. I designed this brochure for roll folding, and this file is formatted based on printing requirements. For that reason, I'll clarify the page and fold order in the pictures next to this text.

**Roll fold**

# Decarbonisation, energy efficiency & electrification

We need this powerful trio to solve **climate change**. Renewable energy is causing volatility in the energy system and changing the way it works. Flexibility & demand response elements are a must to keep the system stable, reliable and reasonably priced.

**The global demand response markets** are growing at an accelerating speed and estimated to be worth 25 billion US dollars by 2022.

## Big batteries on wheels

**Electric vehicles** (EVs) are the most efficient form of storage and the smartest new source of flexibility in the energy system.

**By 2030** there are over 100 million energy storages on wheels with an aggregated storage capacity of 5 TWh – equalling 5 average sized power plants. EVs connect sustainable transportation and energy into an embedded ecosystem. **Electric vehicles are engines of change.**

# Virta charges a positive change

We bring **electric mobility** to people's daily life and make EVs a crucial part of tomorrow's energy system.

Our **digital platform connects** all the key players in the electric vehicle ecosystem and **provides services** for the whole value chain – all over the world.

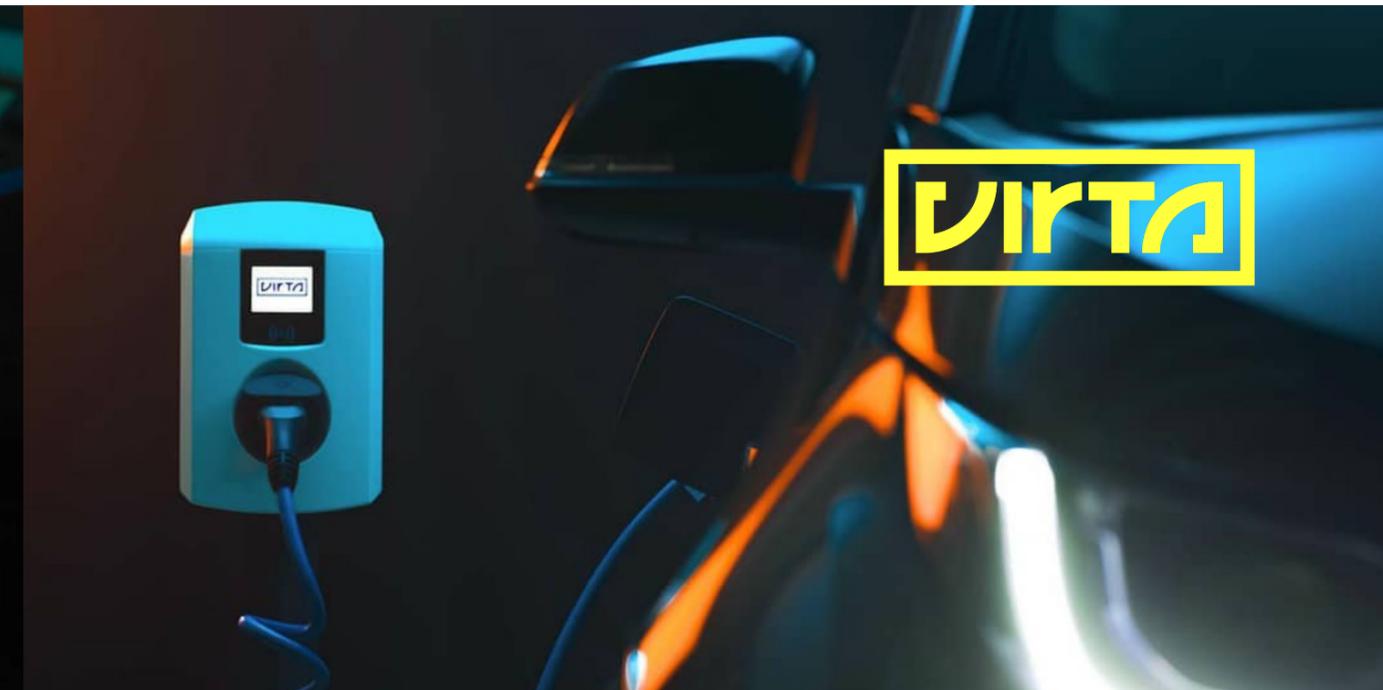

“

**“Smart energy management is essential to make carbon neutral future a reality.”**

## Take charge of your energy

Do you want to be a change maker, create revenue and future-proof your business?

Become part of the ecosystem at [www.virta.global](http://www.virta.global)

**Virta is a forerunner in smart energy management services.**

**Our energy management solutions include:**

- + Virta Dynamic Load Management (DLM)
- + Vehicle-to-grid (V2G)
- + Congestion Management
- + Scheduled Charging
- + Energy Data Services

**Let's take charge of the future - together**
